

## "ANNUAL" REPORT 2012-2013

---

### THE IMPORTANCE OF LOOKING BACK

In this era, "new" is definitely "better" and the many things we want to accomplish in the future grab so much of our attention.

There is constantly new information, new ideas, new needs—there is so much more to be done that, often, we find ourselves focused on the next thing and the next and so on. What we have realized here at Loom is that we can focus on the future to our detriment. We must also stop and look back regularly. We do this for our own wellbeing—so that we are able to see how much has truly been accomplished, rather than only focusing on what hasn't yet.

Our Loom "Annual" Report actually covers the last 18-months as we restructure our fiscal year to begin in July. We are inspired to keep developing for the future as we look back over what is now behind us. The "pinnacle" of our report is the lives that have been changed. We debated whether that was the foundation or the pinnacle and realized it truly is the reason we do everything we do. It is our ultimate outcome. Our financial record keeping, our name and logo change, our desire to have a healthy organization, days spent in strategy and planning, our commitment as individuals to raise our own salaries, the seemingly endless curriculum editing and revisions, the thousands of conversations and the hundreds of planes are to bring God's intentions into the daily lives of the most vulnerable.

Thank you for taking a look back with us. I hope the glance back orients you as it does us to the work ahead. Join us.

A handwritten signature in black ink that reads "Janna Moats".

Janna Moats, Director
